FAQ

If you're also setting up a new web server or another device that's going to become linked to the internet and you need to put it through its paces before it's live, or if you're having difficulty with spy ware and adware networks, there's an hidden document on your Macintosh that can assist.. The Website Name System When you type in the site name of a internet web site you wish to visit right now there's a lot occurring behind the scenes.

It's i9000 known as the Website hosts file, and this is definitely how to use it.
